

CORPORATE POLICY

QUALITY ASSURANCE, ENVIRONMENTAL MANAGEMENT, HEALTH AND SAFETY

MF TRASFORMATORI a leader company in the transformer manufacturing industry is daily committed to provide its customers with the best products and the know-how of the production processes. The Management establishes the corporate strategies in the awareness of the requirements of an integrated organization vision, in which the "quality" issue is dominant, and it's the principle of all the other aspects that contribute to build-up the strategies.

This Quality, Environment and Security Policy is the global commitment that *MF TRASFORMATORI* assumes towards its customers, its personnel and the environment; in order to meet this obligation it has been activated a Quality Management System Environment and Safety according to UNI EN ISO 9001: 2015 (Quality) and ISO 14001: 2015 (Environment).

The general direction that supports and oversees the Corporate Policy, is the customers' satisfaction, the attention to safety and the respect for the Environment, with particular care to continuous improvement. The objective of the Corporate Policy of *MF TRASFORMATORI* is to develop its organization and keep it constantly updated towards the market trends and demands.

In particular the main objectives are the followings:

- to comply with the customer's requirements and mandatory Laws and Regulations by notifying to the entire organization;
- Customer's Satisfaction in terms of contractual requirements and implicit needs of the customer (providing all references needed, ease in contacts, partnerships, ...).
- to ensure that the market recognizes that a Certified Company is able to provide a product/service qualitatively better and of proven reliability;
- Retention of internal and external cooperators;

For this purpose *MF TRASFORMATORI* commits to:

- maintain the respect of the Environment and Safety Laws and Regulations;
- implement and maintain an environmental and quality management;
- increase and train the employees ensuring the involvement in Security;
- motivate, empower and raise awareness of internal and external staff to continuous improvement;
- adopt the scientific discoveries and the most advanced technological tools;
- maintain a proven reliability of suppliers;
- monitor and reduce, where possible, the direct or indirect environmental impacts generated by its activities in normal operating conditions, abnormal or emergency;
- monitor and reduce, where possible, the injuries produced by internal activities;
- carefully monitor the emissions to air and the waste;
- adapt its own risk assessment according to organizational and legislation changes;
- ensure cooperation with public authorities and control bodies;
- prevent and promptly handle any possible environmental or security emergency through the application of preventive and intervention procedures;

The general direction supports the Corporate Policy formulated for the pursuit of goals and for continuous improvement, in addition, is activated to spread and to understand it:

The awareness and engagement of all the staff about the environmental and safety quality objectives is achieved through meetings, communications, billposting and anything else deemed appropriate and effective.
